#### **General Information**

#### Aurubis Finland Oy

#### Programme holder

IBU - Institut Bauen und Umwelt e.V. Panoramastr. 1 10178 Berlin

Germany

#### **Declaration number**

EPD-AUR-20160216-CBA1-EN

### This Declaration is based on the Product Category Rules:

Building metals, 07.2014 (PCR tested and approved by the SVR)

Issue date

09/01/2017

Valid to

08/01/2022

Wiremanes

Prof. Dr.-Ing. Horst J. Bossenmayer (President of Institut Bauen und Umwelt e.V.)

Dr. Burkhart Lehmann

(Managing Director IBU)

#### **Nordic Brass**

#### Owner of the Declaration

Aurubis Finland Oy P.O. Box 60 FI-28101 Pori, Finland

#### Declared product / Declared unit

1 kg Nordic Brass

#### Scope:

This Core environmental product declaration refers to copperstripes and copper sheets produced by Aurubis at Pori Oy site, Finland. Depending on the surface quality, the product is available in different qualities. This EPD refers to the product Nordic Brass. The Life Cycle Assessment is based on data from Aurubis Finland Oy in FI-28101 Pori. The plant is located in Pori, Finland. The data is based on the production year 2015. The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Verification

The CEN Norm /EN 15804/ serves as the core PCR Independent verification of the declaration according to /ISO 14025/

internally

externally

Manfred Russ

(Independent verifier appointed by SVR)

#### **Product**

#### **Product description**

The Nordic Brass product is an alloy of copper and zinc (CuZn15) with a distinctive golden yellow colour. When exposed to the atmosphere, the surface begins to darken within weeks and can change to a dark brown in around a year.

Nordic Brass is available in sheets or coils.

• Thickness range: 0.6 – 2.0 mm

• Maximum width: 1000 mm.

This declaration is valid for the product Nordic Brass.

#### Application

Nordic products are used for facades, roofs, roof drainage systems and other architectural elements of all shapes, as well as interior applications, decorations, ceilings, wall claddings

Relevant standards are: /EN 1172/ in combination with /EN 1976/, /EN 1652/, /EN 504/, /EN 14783/.

#### **Technical Data**

Test standards are: EN ISO 6507-1;2005; EN-ISO 6507-2:2005, EN ISO 6892-1:2009, ISO 1811-2:1988-

10, ISO 4739:1985-05

Physical and mechanical properties

i nysicai ana mechamicai propi	51 1163	
Name	Value	Unit
Coefficient of thermal expansion	18	10 <sup>-6</sup> K <sup>-1</sup>
Tensile strength	310 - 370	N/mm <sup>2</sup>
Density	8750	kg/m³
Thermal conductivity (at 20°C)	335	%W/Cm
Specific heat	375	J/kg K
Proof strength	200 - 290	N/mm^2
Elongation	min 10	%
Hardness	80 - 115	HV

#### Base materials / Ancillary materials

The Nordic Brass product consist of an alloy of copper and zinc (CuZn15) according to /EN 1172/. The copper (Cu) content is 84-86% and the zinc (Zn) content is 14-16%.

The cakes for Nordic Brass sheet production are supplied from Aurubis Schwermetall, in Germany, and only undergo rolling operations at Aurubis Pori.

#### Additives:

Biodegradable rolling oil and emulsion which

is used for cooling and lubrication during the rolling process

Benzotriazole which is used as anticorrosive agent.

#### Reference service life

Copper has a long service life and durability. The rates of copper elutriation under normal atmospheric weathering are between 0.7 g/m²\*a and 1.5g/m²\*a.

#### LCA: Calculation rules

#### **Declared Unit**

The declared unit is 1 kg of Nordic Brass.

#### **Declared unit**

Name	Value	Unit
Declared unit	1	kg
Conversion factor to 1 kg	-	-

#### System boundary

Type of the EPD: cradle-to-gate - with options. According to "System limits" outlined in section 5.5. of the PCR, Part A: "Calculation Rules for the Life Cycle Assessment and Requirements on the Background Report" the following life cycle stages are considered:

 Production, upstream raw materials & energy (Module A1-A3)

- Waste processing for reuse, recovery or recycling (Module C3)
- Benefits and loads beyond the product system boundary (Module D)

#### Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to /EN 15804/ and the building context, respectively the product-specific characteristics of performance, are taken into account. The used background database has to be mentioned.

#### LCA: Scenarios and additional technical information

#### End of life (C1 - C4)

Name	Value	Unit
Collected separately	1	kg
Recycling	0.99	kg

### Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit
Net scrap substituting primary material	1,41	kg
Material loss	0	%

#### LCA: Results
