White marking

# Oroglas<sup>®</sup> Magic

GLOSSY

Reference 870

*Rhythm (from Greek ρυθμός rhythmos): "any regular recurring motion, symmetry" a "movement marked by the regulated succession of strong and weak elements, or of opposite or different conditions.*

## Notes

### Key properties

- > An elegant economical and ecological acrylic sheet!
- > Marking with a YAG laser at 1064 nm wavelength results in a fast and high quality marking. It only takes a few seconds to mark.
- > Traditional cutting laser will not mark your Oroglas<sup>®</sup> Magic. The edge remains black with laser cutting.
- > It could replace screen printing, which means 1 step less in fabrication, and a reduction of chemicals.

**It's magic:** a black pmma sheet and a white / silver print appears.

### How? Oroglas<sup>®</sup> Magic

contains special additive which can be made 'visible' by using special type of laser dedicated for marking.

Type is for example YAG laser.

### Perfect for

- > Signage
- > Display
- > Decoration
- > Funeral objects and more
